

**FOR IMMEDIATE RELEASE**

## **CRAIC Technologies Imaging Software for Windows 7**

**San Dimas, CA (December 22, 2009) --** CRAIC Technologies, the leading innovator of UV-visible-NIR microscopy solutions for science and industry, announced the release of its ImageUV™ microscope camera control and image analysis software for Windows 7™. Scientists and engineers using ImageUV™ running on Windows™ 7 will immediately notice a more fluid response, with Window 7's newly enhanced stability and advanced memory management. Windows™ 7 will further improve the useability of CRAIC's ImageUV™ image analysis software with such features a quick resizing of windows, easier to see icons and speedy access to often used documents and spectra with Jump Lists™. Windows™ Search gives engineers and

scientists even more power as a fast search engine to locate and quickly analyze data. And best of all, Windows™ 7 is designed to more efficiently use resources allowing for even better operation of CRAIC UV-visible-NIR microscopes.

"Windows™ 7 is a momentous enhancement for CRAIC Technologies customers" states Dr. Paul Martin, President of CRAIC Technologies. "All CRAIC microscope customers using our ImageUV™ instrument software on Windows™ 7 will find this new version of Windows™ a much more rewarding experience. With dramatically improved speed, responsiveness and reliability of the operating system, CRAIC customers will experience the benefits of this new operating system immediately."

**About CRAIC Technologies:** CRAIC Technologies, Inc. is a global technology leader focused on microscopy and microspectroscopy in the ultraviolet, visible and near-infrared regions. CRAIC Technologies creates innovative solutions, with the very best in customer support, by listening to our customers and implementing solutions that integrate operational excellence and technology

expertise. CRAIC Technologies provides solutions for customers in forensic sciences, health sciences, semiconductor, geology, nanotechnology and materials science markets whose applications demand accuracy, precision, speed and the best in customer support.
